# TOMOHIRO NAGASAKA

# PROFILE

图像处理/三维姿态识别的实时处理方面有丰富的经验。特别是人体/人脸/手势识别等。

- 奥数日本代表, 京都大学数学博士退学
- 在三家公司经历研究开发总负责人
- 图像处理,深度学习,动作捕捉,实时处理,三维模型
- 不仅了解算法,编码/工程能力也强

# **EDUCATION**

硕士学位 数学·数理解析

京都大学(日本)

April 2009 - March 2011

博士退学 数学・数理解析

京都大学(日本)

April 2011 - October 2013

# **EXPERIENCE**

## 深圳市瑞立视多媒体科技有限公司

○ 深圳

总工程师 2015/12 - 2018/12

职责: 算法研究,设计/开发系统, 管理研发团队

研究/开发内容: RTS系统: RTS系统是支持很大空间的高速高精度跟踪系统。使用多台(2-100+台) 高速红外摄像头,精确地捕捉物体/人体运动。最高可达340FPS。硬件和软件都是公司 自主研发, 而我提供所有软件算法(包括摄影机内部的图像处理)。

项目: VR游戏,视频拍摄,军事训练,教育等

软件:

- Tracker 三维空间刚体跟踪系统
- Tenoomi 人体运动跟踪系统,主要为VR用途(方便使用)
- Rovonga 人体运动跟踪系统,主要为影视用途 (可捕捉细节,包括手指)

动作捕捉 | 骨骼动画 | Multiview Geometry | CUDA | FPGA | Infrared Camera | IMU | Inverse Kinematics Camera Calibration VR/AR 绿屏抠图 3D Geometry Object Detection/Tracking Pose Detection 深度学习 C++ C# Android Network Qt OpenCV OpenGL Unreal Engine 4 Unity

## 深圳趣图科技有限责任公司

♀ 深圳

研发总工程师

2019/01 - 2020/01

职责: 算法研究, 管理研发团队

研究/开发内容:

- 从单张人脸照片生成3D模型
- 人脸实时表情/眼睛捕捉
- Photogrammetry (从照片生成3D模型) 算法云服务+手机app

深度学习 人脸识别 3D model GAN Differentiable Renderer SFM SLAM Texture/Mesh Mediapipe Android Django TensorFlow TFLite WebGL Morphable Model Blender DAZ Stud Meshlab Ubuntu Unity C++ Python JavaScript C# Libigl Object Detection/Tracking Semantic Segmentation Stereo Matching Camera Calibration OpenCV Realsense ZED Stereo camera

## DEMOS ====

### 实时多人三维人体姿态识别

https://github.com/Tomohiro-Nagasaka/MultiPose3D

### 文本转语音工具

https://github.com/Tomohiro-Nagasaka/TomoSpeak

## PUBLICATIONS

Quasi-coherent sheaves on algebraic moduli stacks of log structures (RIMS Kokyuroku Bessatsu B51)

# SKILLS ====

编程语言 (Main): C++, Python, C#, Javascript, CUDA 编程语言 (Others): Java, Kotlin, php, VB, HTML/CSS Frameworks: Tensorflow, OpenCV, Unity, Unreal Engine, Blender, OpenGL, Caffe, Django, Qt, WebGL. Android Studio

## LANGUAGES =

日语 英语 中文

Native

# = INTERESTS ===

力量训练 篮球 钢琴 学习 写代码

# **OTHER WORKS**

## 其他工作

## ♀ 日本/中国

- A control system for automated warehouses (C, Network)
- Object tracking and detection system for microscopic images and videos with GPU computation (C++, CUDA, OpenCV)
- Photo selection system with the GUI of 2D and 3D animation (C#, WPF)
- Translation of a network-related book into Japanese (English)
- Automation of website control (Scraping, HTTP, HTML parser, JavaScript, C#, Chromium)
- QR code reader (C++, OpenCV, ARM)
- Video cutting and editing tools (C#, C++, FFmpeg, OpenCV)
- iOS application development, database management, Web application creation (Objective-C, CakePHP, WordPress, etc.)
- Web application development (ASP.net MVC, JavaScript, less, AmazonAPI, Taobao API, etc.)
- Stereo Tracking system (C++, Qt, OpenCV, Jetson nano/Raspberry pi, C#, Unity)

## 个人开发

- Realtime multi-person 3D pose tracker (Tensorflow lite, ONNX, Python, Unity, OpenGL) https://github.com/Tomohiro-Nagasaka/MultiPose3D
- Multi-language text to speech software with GUI and web API (Tensorflow Lite, Django, Electron, Python, C++, Node.js) https://github.com/Tomohiro-Nagasaka/TomoSpeak
- Simple physics engine, gym environment wrapper, and optimization algorithms such as reinforcement learning / Bayesian optimization (C++, Python, TensorFlow, OpenGL)
- Realtime 3D hand tracking with stereo/single camera(C++, TensorFlow, Python, OpenGL)
- Reading application for foreign languages using the read-aloud function in Android (Java, Android studio)
- Software to modify the playback speed without changing the pitch of the sound using the Fourier transform (C++, C#, OpenCV)
- Chinese and English learning software that uses text-to-speech, Microsoft translation API, and such (C++, Translation API, Text to speech API)
- Noise removal and super-resolution software using deep learning (Caffe, CUDA, OpenCV, C++)
- Text recognition (Caffe, CUDA, OpenCV, C++, C#)
- Card Game (Unity, C#)

# **ABOUT ME**

爱学习,爱运动,爱挑战
